

DOVISTA - Environmental Policy

Environmental Policy

Introduction

DOVISTA develops, manufactures, and markets products that bring fresh air and daylight to people's everyday lives. Our activities involve the procurement and processing of natural resources. This means operating in a way that is protective and respectful of our common environment and responsible with relation to our common resources. While grounded in our Model Company Objective to treat our employees and all stakeholders better than most companies, and conducting our business in a profitable manner, we will continuously assess and develop our environmental efforts.

Target Group

The policy applies to DOVISTA Group and all companies ultimately owned or controlled by DOVISTA Group.

Purpose & Policy

The purpose of this Group Policy is to ensure that DOVISTA manages its negative and positive environmental impacts throughout the value chain and the life cycle of delivering its products and services, to meet its long-term environmental ambitions and goals.

Our aspirational targets

REDUCE emissions and waste from our activities

- Setting time-bound emissions reduction targets in line with the Paris Agreement's goals
- Setting time-bound waste reduction targets
- Moving to centrally located waste receptacles for recycling and waste disposal in production and non-production locations

FOCUS on the efficient use of raw materials, water, and energy in order to diminish negative effects on the environment

- Preserve and protect oceans and forests
- Support biodiversity and conscientious land-use
- Promote fresh air by reducing air pollution

COOPERATE with our suppliers, customers, and other business partners to achieve higher environmental standards

- Ensure environmental protection as a prerequisite of doing business with, in or on behalf of DOVISTA
- Meet or exceed environmental standards DESIGN our products so that their environmental impact during manufacturing, use and disposal is diminished
- Demonstrating environmental vigilance by having a lifecycle approach in developing, planning, and execution of our operations, products, and services
- Delivering a specified level of quality that supports superior product performance at lowest possible cost throughout the entire product life cycle.

EXAMINE new opportunities enhancing the environmental soundness of our products and manufacturing methods beyond what is generally expected

MAINTAIN high standards of safety at work for our employees and encourage sound attitudes towards the environment in our daily activities

- Provide a Safety-First culture in developing, planning and execution of our operations, products and services to ensure safe and healthy working conditions and environment
- Provide ongoing communication to employees regarding opportunities to incorporate environmental consciousness into everyday activities CONTRIBUTE to the planet's sustainable development Create products that promote good health and wellbeing, enhance energy efficiency, represent responsible consumption and production, and support climate action
